

XIANG LIU

Xianlin Campus, Nanjing University, 163 Xianlin Avenue, Qixia District, Nanjing, Jiangsu, China

xliu2319@outlook.com <https://xiangliu-github.github.io/>

EDUCATION

Nanjing University (NJU)

Nanjing, Jiangsu

Master of Science in Atmospheric Science

2021.09 - 2024.06 (Expected)

University of Wisconsin-Madison (UW-Madison)

Madison, Wisconsin

Visiting Student in Atmospheric Science

2020.01 - 2020.08

China University of Mining and Technology (CUMT)

Xuzhou, Jiangsu

Bachelor of Engineering in Environmental Engineering

2017.09 - 2021.06

Related Courses: Bioclimatology, Weather and Climate, Big Data Analysis in Meteorology, Atmospheric Environment Theory and Model, Climate Change Impacts and Adaptations, Atmospheric Aerosols

RESEARCH INTERESTS

- ◆ Developing and optimizing machine learning algorithms to enhance air quality predictions and mitigate the impacts of climate change.
- ◆ Investigating and analyzing the effects of climate change on human health and agricultural productivity, with a focus on identifying adaptation and mitigation strategies.
- ◆ Exploring the processes and mechanisms that govern the interactions between air pollution and vegetation, and developing solutions for reducing the air pollution impacts on ecosystems.

RESEARCH EXPERIENCE

NJU, Nanjing, China

2021.09 - present

Master's Thesis: The Impacts of Air Pollution on Food Security Based on Statistical Inference

Mentor: Professor Haikun Wang, School of Atmospheric Sciences

Independent Research: Global Ozone Mapping

- ◆ Harmonized surface ozone measurements and multi-source data (e.g., satellite and reanalysis) to a modeling dataset
- ◆ Developed and validated the proposed cluster-enhanced ensemble learning algorithm for global ozone predictions
- ◆ Compared the results with other studies, demonstrating the highest accuracy of our data

Independent Research: Global Warming, Ozone omission, and Crop yields

- ◆ Used a fixed effect model to uncover the air pollution and meteorological impacts on global crop yields
- ◆ Estimated the marginal effects of ozone and temperature on 18 crops across the globe.

- ◆ Projected the future yield impacts from changes in ozone and warming levels.

Independent Research: China's Air Pollution & Crop Growth

- ◆ Assembled a panel dataset of myriad spaceborne remote sensing, such as SIF, and climate data
- ◆ Established a statistical crop model to analyze the relationships between crop growth and air pollution levels
- ◆ Evaluated the air quality-driven changes in crop yield and air pollution-attributed impacts on food security in China
- ◆ Explored the pathway to abate ozone and aerosol pollution, demonstrating that reducing ozone pollution benefits more than aerosols.

UW-Madison, Madison, U.S.

2020.01 - 2020.08

Research Assistant

Mentor: Professor Ankur R. Desai, Department of Atmospheric and Oceanic Sciences

Independent Research: U.S.'s Air Pollution, Heat Stress, and Crop Yields

- ◆ Performed and processed extensive data collection including USDA NASS agricultural statistics and GHCN weather data
- ◆ Conducted further analysis through an empirical model to analyze the air pollution impacts on historical crop yield
- ◆ Found that maize and soybean behave differently in response to combined air pollution and heat stress effects

NJU, Nanjing, China

2019.08 - 2020.01

Research Assistant (Summer Intern)

Mentor: Professor Yanxu Zhang, School of Atmospheric Sciences

- ◆ Modified and revised the MOZART boundary to initiate the model simulation
- ◆ Used WRF-GC, a new online atmospheric chemical transport model, to forecast air quality in China
- ◆ Generated daily results on WRF-GC model through Python and NCL scripts
- ◆ Maintained a website that provides a daily prediction of air quality in China

CUMT, Xuzhou, China

2019.05 - 2019.07

Research Assistant

Mentor: Associate Professor Ping Lou, School of Environment and Spatial Informatics

- ◆ Prepared planktonic crustacean *daphnia magna* for experiment operation
- ◆ Designed and conducted experiments to explore the relationship between *daphnia magna* mortality and nano-silver concentration in water

HONORS & AWARDS

- ◆ Guorui Scholarship, School of Atmospheric Sciences, NJU, 2022
- ◆ Undergraduate Study Abroad Scholarship, CUMT, 2019
- ◆ National Undergraduate Encouragement Scholarship, CUMT, 2019
- ◆ Third Prize Scholarship, CUMT, 2018

TECHNICAL SKILLS

- ◆ **Coding languages:** R, Latex
- ◆ **Chemical transport models:** GEOS-Chem, WRF-Chem

Latest updated: September 14, 2023
